The 3rd Transnational Project Meeting for the “DigiER” project has been successfully implemented!

During the meeting, each of the partners described the work on the project that had already been completed at this stage. The participants analyzed the strengths and weaknesses of the current work, presenting the most important tasks to be performed in the near future. They shared their upcoming tasks and responsibilities.

The process of implementing the current state of the IO result, i.e. Guide on Digital transborder Entrepreneurship, strategies in the business environment (including: Content development; Programming implementation) was discussed. The implementation plan, the plan to translate into the partners' national languages as well as the content implementation in these countries were also discussed. Of course, The topic of the pilot of the DigiER manual was not omitted.

The leader also reminded the rules related to management.

The current and planned method of disseminating the results of the DIGIER project was discussed by KAINOTOMIA. CWEP discussed the planned activities related to the implementation of O2: DigiER mobile application for entrepreneurs (INCLUDING: Setting up and adjusting development environment for Android and IOS; Preparation of application scenario; Programming phase; Internal testing of the English version).

A date has been set for the next meeting of the DIGIER project group in Slovenia.
